

Tony,

How are things?

I'm recovering from back surgery right now (ugh) and have been spending a lot of time in my music room listening to your speakers. They are easily the best speakers I've ever owned. They totally disappear during CD and vinyl playback. Soundstage and imaging is incredible. The singer is literally in front of me in the middle of the room. And when players take their solos, there is spatial definition. I know the trumpet player is not only to the left or right but front or back, close or far away. Amazing. And, all things considered, pretty good bass. Love those PHY drivers! I will give you more feedback when I feel better. On the mend right now. Won't be climbing mountains for awhile ... :-

Hope all is well.

Tom
